

Solar LED Lantern

Technical Specification:

MODEL	: USL 12L8
BODY	: Strong ABS body/Acrylic glass with high quality parts for long life.
BRIGHT LED's	: 8 Nos. of Powered by Ultra bright multiple chip LEDs.
LED LIFE	: 1, 00, 000+ hours of LED life.
SWITCH	: Double switch mode, HIGH-LOW.
BATTERY	: 6V / 4.0 Ah SMF Battery
SOLAR PV MODULE	: 6V / 5 Wp
CHARGING TIME	: 5 to 6 Hours
OPERATION TIME	: 12 Hours
INDICATIONS	: Charging On - Yellow LED Low Battery- Red LED
PROTECTIONS	: Low Battery Cut Off & Battery Overcharge Cut Off.

SOLAR PV MODULE MAINTENANCE

Minimal maintenance is required to maintain optimal module performance. If the module becomes dirty, a reduction in energy output may result. We recommend the use of water and a soft cloth or sponge to clean the glass module surface. A mild non-abrasive detergent may be used on persistent contaminants. We recommend a semiannual inspection of all electrical and mechanical connections for cleanliness, tightness and absence of damage. Protect yourself against possible electrical shock during maintenance. Correct any problems found.
